Introduction/Acknowledgements

This updated manual is designed to assist new driver license applicants to understand and remember information which is required to obtain and retain a Montana driver license. It is also intended to help the applicants understand why there are traffic laws and rules, with the result being an appropriate respect for them.

This publication builds upon the traffic rules, regulations, laws, and other material contained in the Montana Driver's Manual. It is organized and presented in a clear and easy-to-read format. Each section is followed by a self test for review purposes. Students may check their answers with the key in Appendix B.

The Traffic Education and the Motor Vehicle Division staff hope this manual will assist the driver examiner, as well as Montana's traffic and special education program personnel in helping individuals obtain a learner's license and, subsequently, a Montana Driver's license. We believe that better informed drivers are more courteous and defensive and they help make our highways and streets safer and more enjoyable.

We are most indebted to the Adapted Manual Review Committee for their dedication, hard work and attention to detail.
